

Mystery Quilt Part 2

Using some of the 2" strips cut in Part 1, make the following number of 9-patch blocks, each of which will have 5 squares of background fabric and 4 squares of 4 other fabrics. You should only need one and a half 45" strips to make enough strip sets for 28 nine patch blocks. The rest of the strips will be used later.

Crib	Double	Queen
28	100	184

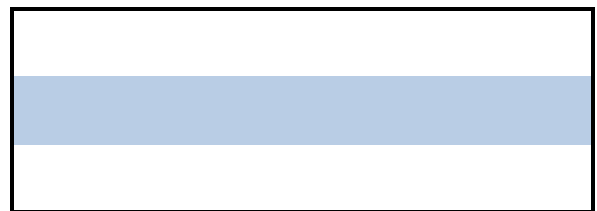

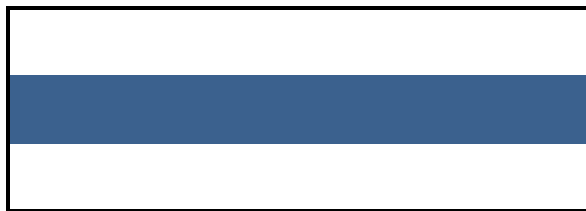

Make sure that you are using a scant 1/4 inch seam allowance. If you are sewing accurately, then the result of sewing two 2 inch strips together, results in a strip set that measures 3.5 inches wide.

Fabrics A, B, C and D refer to the minimum number of contrast fabrics in the block. They can be replaced by scraps, so that you have randomly placed fabrics throughout your 9 patch blocks.

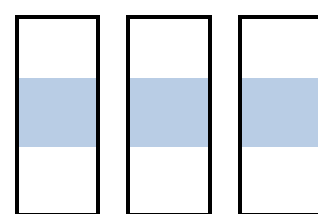

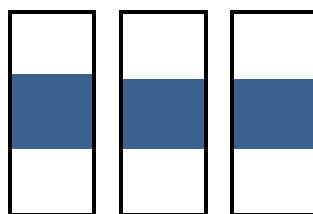

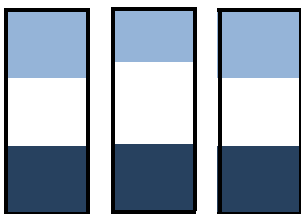

- 1) Piece a 2 inch strip of background fabric in between 2 inch strips of fabrics A and B.

- 2) Piece together a 2 inch strip of fabric C in between two 2 inch strips of background fabric. Repeat with fabric D.

- 3) With a rotary cutter, straighten one end of each of the strip sets pieced together above. Sub cut the strip sets into 2x5 inch rectangles.

- 4) Sew the rectangles from Step 3 together to create the 9 patch block shown below. It should measure 5 inch square.
